5Strands® Affordable Pet Testing Case Study Outline

We appreciate your feedback regarding your experience with 5Strands® Affordable Pet Testing! Please also provide a before and after photo of your pet! We understand that by providing this information you are granting permission for us to share your story on 5Strands® Affordable Testing's websites, social media and in marketing materials.

Pet's Name: Riley

Pet's Breed & Sex: Vizsla Mix- 4 years old. Male.

Describe condition of pet and/or symptoms before using *Affordable Testing*.

Before we got a test, Riley's stomach was balding and his skin was really dark around his legs and under arms.

What type of food was your pet eating prior to testing (i.e. kibble, raw, frozen, freeze dried, etc.)?

He was eating kibble with limited ingredient treats.

Describe the results of *Affordable Testing* (i.e. number and/or examples of items reported as intolerances, insight gained, etc.).

When we got the results back, we got so many answers. A few of the treats he got regularly had ingredients that popped up on his allergy test.

What elimination plan did you implement (i.e. foods eliminated and/or changes in environment, timeframe, etc.)?

We highlighted the items on our results that seemed to be things Riley ate often and planned on eliminating these ingredients from his treats and his food.

Describe condition of pet and/or symptoms after the elimination plan.

We noticed that his fur started to grow in a bit, he still has some bald patches on his stomach... but we haven't eliminated everything on his list.

The dark spots around his under arms and legs are totally gone which was the main concern of ours. I am sure if we continue to eliminate things that are in the yellow and green sections of his list, his fur will grow in even more.

What is your impression of the *Affordable Testing* process and results of the elimination plan (i.e. length of time to receive results, quality of customer service, value of information gained, etc.)?

Affordable Pet testing has changed our lives completely. We have tested all five dogs in the family and its been really useful information to have. Even if you don't think your dog has any intolerances or issues, its still worth testing them just so you know if things come up in the future.
