5Strands® Affordable Pet Testing Case Study Outline

We appreciate your feedback regarding your experience with 5Strands® Affordable Pet Testing! Please also provide a before and after photo of your pet! We understand that by providing this information you are granting permission for us to share your story on 5Strands® Affordable Testing's websites, social media and in marketing materials.

Pet's Name: Diorabelle 8-24-2015

Pet's Breed & Sex: Long Coat Chihuahua Female

Describe condition of pet and/or symptoms before using *Affordable Testing*.

Diorabelle was not gaining much weight, had very itchy skin, losing fur to the point of bald patches, red watery eyes, sneezing and wheezing, constantly chewing on paws and scratching ears, and tummy issues of all sorts. She was a miserable pup with low energy. The vet put her on prescription food. It did help some but not enough. Back to the drawing board of searching, this had been going on for 2 years.

I just happened to stumble upon Affordable Testing while doing my many hours of exhausting research. The price was affordable and the information they promised seemed invaluable. My fingers were crossed and my mind hopeful THIS would finally be giving me the answers I needed.

What type of food was your pet eating prior to testing (i.e. kibble, raw, frozen, freeze dried, etc.)?

When I first got Diorabelle she was eating Blue Buffalo Life Protection Chicken Base... (she had hair loss when I got her, so she was intolerant to that food). I switched her to Nature's Variety Chicken with Raw Boost, then the vet switched her to Hills Prescription Food. That food helped a bit, but was not the answer.

Describe the results of *Affordable Testing* (i.e. number and/or examples of items reported as intolerances, insight gained, etc.).

It literally took less than 10 days to get the results emailed. I was pleasantly surprised! Even more shocked when I saw the results of the test. Diorabelle had more than 13 food intolerances and several environmental intolerances. ALL of her food intolerances could be found in EVERY single dog food on the market, including the very most expensive brands. Most of her allergies were proteins. We were literally unknowingly making her sick with the wrong foods. I was back to researching but THIS time armed with the right data to get my little girl healthy. I hit the internet with confidence this time. I NOW know what NOT to feed her. Now to figure out what I could feed her.

What elimination plan did you implement (i.e. foods eliminated and/or changes in environment, timeframe, etc.)?

We simply chose to eliminate the level 3 items on her report! I was more cautious of her surroundings thanks to the environmental report, but I knew most of her issues were do to her diet.

Describe condition of pet and/or symptoms after the elimination plan.

What a difference a few months can make when armed with the correct information.

Within 4 months of Diorabelle getting on the right nutrition plan (eliminating trigger foods) she has gained 1 pound (she's now 4 lbs), only has occasional itching, bright clear eyes, her coat is coming in thick and lush (no bald spots), she has much more energy and her tummy issues are gone. She is a very healthy happy pup now!

What is your impression of the *Affordable Testing* process and results of the elimination plan (i.e. length of time to receive results, quality of customer service, value of information gained, etc.)?

I cannot thank Affordable Testing enough! THIS test literally saved Diorabelle from loads and loads of painful allergy testing at the vets. Not to mention the thousands of dollars saved not having to do those expensive tests! Armed with the excellent easy to read information from Affordable Testing I was able to create a raw diet for Diorabelle (there is not one single brand on the market that doesn't contain at least one of her intolerances).

Within the first week of eliminating those intolerances we saw a big difference in Diorabelle. Her coat, eyes, personality, temperament, and energy level all improved greatly. There was also noticeably less itching after the very first day. I had been struggling for 2 years trying to figure out how to help her get healthy. THIS test with my quick action started her healthy life in just 3 weeks. She barely looks like the same pup.

Affordable Testing is AMAZING!

Don't hesitate order today and get your pet healthy too!

You'll be so happy you did!
